

Loss of an approved indicator or approved secondary indicator on site.	You must apply a new approved indicator and a matching approved secondary indicator to cervids that have lost either of their approved indicators at your site.	As soon as the loss of the approved indicator is noted.
Report the application of the approved indicators.	<p>When applying an approved indicator to cervids, you must report the following information to the responsible administrator:</p> <ul style="list-style-type: none"> • The identification number of the new approved indicator • If known, the identification number of the approved indicators^{1 2} previously applied • The premises identification number of your site • If known, the premises identification number of the departure site • If applicable, the license plate number or conveyance identification <p>You are not required to report the application of the approved indicators if the cervids have not been moved from their farm of origin.</p>	Within 7 days of application of the new indicators.

DEPARTURE OF CERVIDS FROM YOUR FARM

WHAT TO DO?		TIME LIMIT
Report the departure of cervids.	<p>When cervids leave your farm, you must report the following information to the responsible administrator:</p> <ul style="list-style-type: none"> • The premises identification number of your farm • The premises identification number of the destination site • The date and time the cervids left your farm • The identification number on the approved indicators^{1 2} • The license plate number or conveyance identification <p>You are not required to report the arrival of cervids at your farm, unless they are returning from a community pasture.</p>	Within 7 days of departure.
Movement of cervids from a leased pasture.	You are required to report the departure of cervids to a leased pasture, but you are not required to report their return to your farm, if all the cervids kept at the leased pasture were from that same farm.	-
Movement of cervids within the same farm.	You are not required to report the movement of cervids if they are moved within the same farm.	-

For **import** and **export** requirements, refer to the Importers and Exporters guidance documents

DISPOSAL OF CERVID CARCASSES

WHAT TO DO?		TIME LIMIT
Identify the cervid carcasses.	Cervid carcasses must be identified with an approved indicator and approved secondary indicator if you move them off site for disposal.	Before the carcass leaves the site.
Report the on site disposal of the carcasses.	<p>When disposing of cervid carcasses on site, you must report the following information to the responsible administrator:</p> <ul style="list-style-type: none"> • The premises identification number of the site where the carcass was disposed of • The date on which the carcass was disposed of • The identification number on the approved indicators^{1 2} <p>If you dispose of a cervid carcass on its farm of origin that has not had approved indicators applied to it, you are not required to apply approved indicators to it or report its disposal.</p>	Within 7 days of application of the new indicators.

PROHIBITIONS

IT IS PROHIBITED TO

- Remove or cause the removal of cervids or cervid carcasses from a site unless they bear an approved indicator and approved secondary indicator, with the exceptions listed in the “Animal identification” section above.
- Apply an approved indicator or approved secondary indicator to cervids or cervid carcasses that are not at the site for which the indicators were assigned.
- Apply an approved indicator or approved secondary indicator for cervids to animals that are not cervids or to carcasses that are not cervid carcasses.
- Transfer an approved indicator or approved secondary indicator from a cervid or its carcass to another animal or carcass, or reuse an approved indicator or approved secondary indicator.
- Apply, make, sell, or provide a means of identifying cervids or carcasses that is likely to be mistaken for an approved indicator or approved secondary indicator.
- Remove³ an approved or revoked indicator from a cervid or its carcass, except at the time and place of disposal of the carcass.
- Alter an approved indicator or approved secondary indicator in any manner.
- Give, sell or distribute approved indicators or approved secondary indicators assigned for your site.

DEFINITIONS

Approved indicator: refers to indicators approved under the Livestock Identification and Traceability Program. In most cases approved indicators are approved ear tags.

Approved secondary indicator: refers to secondary indicators approved under the Livestock Identification and Traceability Program.

Revoked indicator: refers to indicators that are no longer approved under the Livestock Identification and Traceability Program.

Carcass: Refers to any part of the carcass of a ruminant or pig that exceeds 50% of its weight and, as a general rule, it refers to dead stock.

Farm: refers to land, and all building and other structures on that land, that is used under one management for breeding or raising animals, but does not include an artificial insemination unit.

Farm of origin: refers to the farm on which an animal is born, or if an animal is not born on a farm, the first farm to which it is moved after its birth.

Site: refers to premises where ruminants or pigs or the carcasses of ruminants or pigs are kept or collected, but does not include a conveyance.

¹ When you are required to report to the responsible administrator an identification number on an approved indicator of a cervid or cervid carcass that bears a revoked indicator instead, you must report the identification number on the revoked indicator.

² When you are required to report to the responsible administrator an identification number on an approved indicator of a cervid or cervid carcass that bears an approved secondary indicator only, you must report the identification number on the approved secondary indicator.

³ The removal of an animal's approved or revoked indicator could be authorized if an inspector determines, based on information provided (whether before, at the time of or within 7 days of the removal of the indicator), that the indicator is causing the animal to suffer.
