

NUCLEAR AND FIELD-GROWN SEED POTATOES ORIGINATING FROM PEI

Field-grown seed potatoes:	Soil grown
Nuclear stock seed potatoes:	Grown in a soil-free environment (in vitro or protected environment)
Category A:	Index fields, where potato wart has been detected
Category B:	Adjacent fields, next to Category A fields, not separated by a physical barrier of more than 15m wide
Category C:	Primary Contact fields, may have had soil or host plants transferred to them from a Category A field, or had common equipment moved to them directly after use in a Category A field.
Category D:	Other Contact fields, where common equipment has been shared with a Category A field.
National Seed Potato Certification Program:	Supplies Canadian growers of seed, table stock and processing potatoes with certified seed which is of high varietal integrity and is relatively free of tuber borne diseases
Parent field(s):	Field(s) of the seed source
